

Threaded UNF Caps (AC)

Threaded caps that effectively protect external threads where, in most cases, the liquid is inside the application that is tested under pressure. Some products are available with sealing features to ensure tight closure. Soft and hard material versions are possible in order to match different requirements. Some parts are available with washer.

Applications:

AC range is recommended for multiple hydraulic applications such as: gear pumps, control valves, cylinders, steering systems; engine components: blocks, heads, power train transmissions, etc.

Main features:

- 

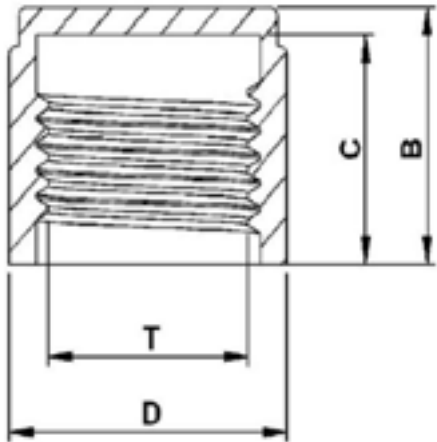

Ideal solution for cylinders, gear pumps, control valves
- 

Suitable for Automotive Hydraulics segment
- 

Sealing features for tight closure
- 

Made of RECYCLE LDPE, LLDPE, HDPE & PA66
- 

Outside vertical ribs for easy mounting & dismounting

Properties

Standard colour: Yellow- Other colors may be available upon request
Standard material: RECYCLE LDPE
