

Center Pull-Out Plugs (DT)

DT product range consists of newly designed plugs with an ergonomic center pull handle, offering easy grip and removal, even with working gloves. The length of the plug ensures tight internal closure during the transportation, storage and assembly processes, whereas the flange protects the external surface. It is an excellent product dedicated for the counter parts with an O-ring, due to the special design at the bottom that protects the O-ring .

Applications:

DT range is recommended for protection of fuel & fluid lines, especially for the counter parts with an O-ring.

Main features:

Ideal solution
for fuel & fluid
lines

Suitable for
Automotive segment

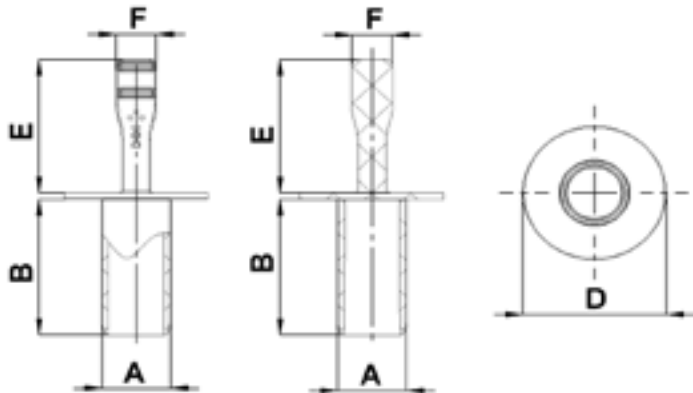

Ergonomic handle

Made of
RECYCLE LDPE
& BIO LDPE

Easy mounting
& dismantling

Properties

Standard colour: Natural- Other colors may be available upon request. Products dedicated for VDA standards available in blue.
Standard material: RECYCLE LDPE
